Summary

As a Computer Science student, I'm excited about coding especially in JavaScript and I enjoy working with databases to keep everything running smoothly. I've built full-stack applications using the MERN stack and REST APIs, and I'm experienced in creating web apps that look great on any device. Right now, I'm working as an IT Helpdesk at Reliance Sasan Power Limited, where I handle HCL Mail and Microsoft SQL Server operations, sharpening my troubleshooting and database skills along the way. I driven by the challenge of crafting efficient, scalable tech solutions and love seeing my work make a real impact.
